Swisslog showcases automated material transport system innovation at the 2008 International Conference and Exhibition on Health Facility Planning, Design, and Construction (PDC) in Orlando, FL.

Denver, CO – Swisslog, a leader in automated material transport systems for the healthcare industry, will exhibit in at booth #423 at the 2008 International Conference and Exhibition on Health Facility Planning, Design, and Construction (PDC) in Orlando, FL, March 10-13, 2008.

The ever-changing demands of the healthcare industry provide distinct challenges for hospital construction, additions and renovations. Swisslog, by virtue of serving healthcare for over nine decades, has developed a total system solution, defined and specified by hospital staffs. Swisslog will be showcasing its TransLogic pneumatic tube system (PTS), which meets the unique material transport requirements of hospitals.

Renowned for reliability, TransLogic pneumatic tube systems transport carriers at speeds up to 25 feet per second with payloads of up to 15 lbs. In addition, TransLogic pneumatic tube systems continue to innovate in response to the demanding needs of hospitals. The result is on- demand transport with increased productivity, faster turnaround time, lower operating costs, and greater safety.

Swisslog also offers a variety of other solutions to hospital logistic challenges, including the TransCar automatic guided vehicle system (AGV) and the PillPick automated drug management system (ADMS). From total system design and manufacturing to

installation and customer support, Swisslog provides a complete hospital supply chain management approach to logistic challenges.

About Swisslog

Swisslog is a global provider of integrated logistic solutions for warehouses, distribution centers and hospitals. The comprehensive portfolio ranges from building complex warehouses and distribution centers including Swisslog's software, in-house logistics solutions for hospitals as well as software and consulting services in the field of supply chain management. Swisslog's solutions optimize the customer's production, logistics and distribution processes in order to increase their flexibility, responsiveness and quality of service, while minimizing logistics costs. With years of experience in the development and implementation of integrated logistics solutions, Swisslog provides the expertise that customers in more than 50 countries around the world rely on. Headquartered in Buchs/Aarau, Switzerland, Swisslog currently employs around 1,850 staff in 23 countries worldwide. For more information, visit www.swisslog.com.
