Swisslog Pharmacy Inventory Management Solutions on Display at American Society of Health-System Pharmacists (ASHP) Midyear Clinical Meeting in Orlando, December 8-10, 2008

Denver, Colo. ([PRWeb](#)) November 4, 2008 -- Swisslog, a leader in pharmacy automation solutions for hospitals, will display its pharmacy inventory management solutions booth 228 at the American Society of Health-System Pharmacists (ASHP) Midyear Clinical Meeting and Exhibition Dec. 7-11, 2008, in Orlando, FL.

Visitors have the opportunity learn about Swisslog inventory management solution and view two essential components of this solution- Swisslog's BoxPicker automated storage & retrieval system and PillPick automated drug management systems in operation. The BoxPicker is an efficient, spacesaving modular storage and retrieval system that is the superior alternative to vertical carousels. PillPick is a fully automated, unit-dose packaging, storage and dispensing system that improves pharmacy production and patient safety.

Swisslog pharmacy automation systems allow hospitals to manage pharmacy inventory in three simple steps. First, hospitals utilize an affordable packaging and labeling solution for barcoding all medications. Next they can integrate inventory management software to help track pharmacy expenses. Finally the hospital realizes the benefits of a storage and retrieval solution that is safer, more secure and faster than vertical carousels with a refrigerated option.

Booth attendees will be eligible to receive a 1gigabyte memory capsule just for completing a survey, and be entered to win the daily prize of a Nintendo DS Lite or the grand prize of a Garmin Nuvi 660 Personal Travel Assistant.

swisslog

Hospitals of all sizes - centralized or decentralized - can benefit from Swisslog's affordable, efficient and complete inventory management solution. This total system approach offers a wide array of solution approaches based on each hospital pharmacy's mode of operation.

About Swisslog:

Swisslog is a global provider of integrated logistics solutions for warehouses, distribution centers and hospitals. Its comprehensive services portfolio ranges from building complex warehouses and distribution centers to implementing Swisslog's own software.
