### **Compact High-Speed Tablet Packager Now Available through Swisslog**

Denver, CO. – Swisslog, a leader in providing pharmacy automation and material transport solutions for hospitals, now offers a compact and affordable high-speed packager with an unmatched capacity for its class. The ATP-71 can accommodate up to 71 canisters in a small footprint (31.5 inches wide x 29.6 inches deep) while offering 100% bar coding for oral solids through a universal feeder.

The packager can handle both unit dose bar codes and box replenishment, making this system both an adaptable and productive partner for any hospital pharmacy. The unit has a packaging speed of up to 60 packages per minute. An external tray is available for the system's non-formulary medications. With the ability to network multiple devices, the ATP-71 offers redundancy as well as high speed dispensing.

The ATP-71 is available to hospitals in North America through an agreement with TCGRx, a provider of automation medication management products and services based in Powers Lake, WI. Through the agreement, Swisslog will provide hospitals with an automated medication management solution that can include high-speed packaging and automated drug storage and retrieval through Swisslog's BoxPicker.

**swisslog**

The high-speed packager can work in conjunction with Swisslog's [BoxPicker](#) - high-density automated medication storage and retrieval system that is analogous to a vertical carousel. Unlike carousels, BoxPicker has single-opening/loading drawers for secure access, no exposed moving parts for user safety and a picking rate that is far faster than carousels. BoxPicker offers total inventory control software that directly interfaces with hospital information systems.

### **About TCRGx**

TCGRx offers pharmacy optimization across space, labor, and inventory. As demands on the pharmacy have become increasingly more difficult to manage, solutions have been offered to address the individual areas of need. TCRGx looks at all facets of the pharmacy to bring a total solution that addresses today's needs while leaving options open for the future.

TCGRx offers some of the most reliable pharmacy automation on the market backed by a comprehensive design and workflow solutions analysis. Decades of experience proves that automation cannot be completely successful without a well thought out plan behind the installation. TCRGx was founded by some of the industry's most experienced professionals with the goal of optimizing space, labor, and inventory. For more information visit, [www.tcgrx.com](http://www.tcgrx.com).

### **About Swisslog**

Swisslog is a global provider of integrated logistics solutions for warehouses, distribution centers and hospitals.
