Swisslog Announces New Pick-to-Light Storage Solution for Hospital Pharmacies

DENVER, Colo. (July 6, 2011) – [Swisslog](#), a leading provider of automated materials transport and medication management solutions for hospitals, today announced the addition of MedPickRx™, a pick-to-light pharmacy storage solution, to its portfolio of medication management products.

Led by market demands for an activity-based storage solution for bulk medications, MedPickRx provides hospitals with an alternative to traditional carousels and shelving. The innovative modular solution features light-directed and barcode-verified picking for technicians, tracking inventory at each step to provide perpetual inventory. Unlike other storage solutions, MedPickRx will reduce labor and space by storing 100% of formulary in a fraction of the space.

“Our customers are demanding storage solutions that will enable them to quickly and easily access their medications while maintaining the accuracy of their picking,” said Ben Hinnen, vice president of Swisslog’s [Automated Drug Management Systems \(ADMS\)](#) business unit. “MedPickRx provides the storage pharmacies need in a compact space and will accelerate picking and improve accuracy with its unique pick-to-light process.”

swisslog
