Swisslog Introduces Replacement Motor Plate Upgrade for Pevco™ Pneumatic Tube System Stations*

Denver, CO. – Swisslog, a leading provider of pneumatic tube systems for hospitals, introduces a replacement station motor plate for Pevco™ pneumatic tube system stations.

“We are pleased to offer an enhancement like this to the facilities that have Pevco™ systems,” says John Kennedy, Swisslog’s Pneumatic Tube System Product Manager. “We designed the unit to be a more serviceable assembly making routine maintenance tasks simpler and allow for a quicker return to service.”

Design improvements include faster mechanism positioning, an improved full bin sensor, highly reliable non-contact optical switches, molded dispatcher and slide plate seals for positive carrier lift-off and soft carrier landing. The unit is easily removed for routine maintenance.

One of the major benefits of the motor plate is that it provides the ability to add RFID technology to Pevco™ mechanical components. RFID is used in pneumatic tube systems for carrier tracking, carrier inventory management and segmenting carriers by function to reduce the potential for cross-contamination.

swisslog

Swisslog's replacement station motor plate assembly is designed for 6-inch Pevco™ single line send/receive stations. Versions are available for stations running Pevco™ control panels and those that have been upgraded to run on Swisslog's TransLogic IQ control panels.

To learn more about Swisslog's replacement station motor plate upgrade for Pevco pneumatic tube systems, call Swisslog Customer Support at 800-764-0300 (USA) or 877-294-2831 (Canada).

About Swisslog

Swisslog is a global provider of integrated logistics solutions for warehouses, distribution centers and hospitals. Its comprehensive services portfolio ranges from building complex warehouses and distribution centers to implementing Swisslog's own software to intra-company logistics solutions for hospitals.

Swisslog's solutions optimize customers' production, logistics and distribution processes in order to increase flexibility, responsiveness and quality of service while minimizing logistics costs. With years of experience in the development and implementation of integrated logistics solutions, Swisslog provides the expertise that customers in more than 50 countries around the world rely on.

Headquartered in Buchs/Aarau, Switzerland, Swisslog currently employs over 2,000 staff in about 20 countries worldwide. The group's parent company, Swisslog Holding AG, is listed on the SIX Swiss Exchange (security number: 1232462, Telekurs: SLOG, Reuters: SLOG.S). For more information, visit www.swisslog.com.

Swisslog's Healthcare Solutions division is the world leader providing logistics automation mainly for healthcare markets. Swisslog has installed hospital material transport and pharmacy automation systems in more than 2,000 hospitals and pharmacies throughout the world. Swisslog offers total system design, manufacturing, installation and customer support providing a complete hospital supply chain management approach to logistics challenges. Swisslog Healthcare Solutions division headquarters is located in Denver, CO
