Swisslog's Radio Frequency Identification (RFID) Provides Delivery Verification for Sensitive and Patient-Critical Pneumatic Tube System Transactions

Denver, CO – Swisslog, a leading provider of automated material transport solutions for hospitals, provides Radio Frequency Identification (RFID) for tracking of pneumatic tube system transactions, as well as carrier management for department-specific use and balancing the distribution of empty carriers.

The new [RFID brochure](#) provides detailed information on the many features Swisslog's RFID solution provides. RFID not only provides hands-free carrier tracking capabilities, but also aids in carrier management. The carrier management feature includes automated carrier inventory for each station, home station carrier assignments—always returning the carrier to its home station, and even intra-departmental assigned carriers—reducing the risk of cross contamination.

To receive a copy of the Swisslog RFID brochure, contact Healthcare Solutions at 1-800-764-0300 or email healthcare@swisslog.com.

About Swisslog

swisslog

Swisslog is a global provider of integrated logistics solutions for warehouses, distribution centers, and hospitals. Its comprehensive services portfolio ranges from building complex warehouses and distribution centers to implementing Swisslog's own software. In addition Swisslog provides intra-company logistics solutions for hospitals as well as software and consulting services in the field of supply chain management.

Swisslog's Healthcare Solutions division is the world leader providing logistics automation mainly for healthcare markets. Swisslog has installed hospital material transport and pharmacy automation systems in more than 2,000 hospital and pharmacies throughout the world. Swisslog offers total system design, manufacturing, installation and customer support providing a complete hospital supply chain management approach to logistics challenges. Swisslog Healthcare Solutions division headquarters is located in Denver, CO with corporate headquarters in Buchs/Aarau, Switzerland.
