### **Swisslog's TransLogic Wall-Mount Station Provides the Function of a Full-Size Pneumatic Tube Station in Hospital Departments with Limited Space**

Denver, CO – Swisslog, a leading provider of automated material transport solutions for hospitals, has released a brochure on the TransLogic Wall-Mount Station for pneumatic tube systems. The Wall-Mount Station is smaller than the Recessed Station, maximizing space utilization and requiring only minimal construction for installation. The Wall-Mount Station's I.Q. Control Panel gives the Wall-Mount Station the flexibility to incorporate the latest Swisslog technology products, such as Alert Messaging, WhoTube™ card access and RFID tracking.

The [Wall-Mount Station](#) can be customized with an optional full-dispatcher for heavier payloads weighing up to 15 lbs., as well as a Multiple Receive Kit allowing multiple carriers to be received into a basket located beneath the Wall-Mount Station.

To receive a copy of the Wall-Mount Station brochure, contact Healthcare Solutions at 1-800-764-0300 or email [healthcare@swisslog.com](mailto:healthcare@swisslog.com).

### **About Swisslog**

Swisslog is a global provider of integrated logistics solutions for warehouses, distribution centers, and hospitals. Its comprehensive services portfolio ranges from building complex warehouses and distribution centers to implementing Swisslog's own software. In addition
