### **Swisslog's Xpress Station for the Pneumatic Tube System Provides Simultaneous Dispatch/Receive Capabilities for High Volume Healthcare Departments**

Denver, CO – Swisslog, a leading provider of automated material transport solutions for hospitals, has released a brochure on the Xpress Station for pneumatic tube systems. The Xpress station features separate and independent ports for the dispatch and receiving of carriers—capable of sending/receiving a carrier every 10 seconds.

[Xpress Stations](#) immediately dispatch carriers from the station so the next carrier can be processed—virtually eliminating dispatch wait times. The compact, recessed design is ideal for departments with space constraints—providing the function of multiple stations within one station unit, as well as an expanded receiving bin that can accommodate up to 8 4-inch carriers.

To receive a copy of the Xpress Station brochure, contact Healthcare Solutions at 1-800-764-0300 or email [healthcare@swisslog.com](mailto:healthcare@swisslog.com).
