Swisslog pneumatic tube system capabilities profiled in new brochure

Denver, CO - Swisslog, the leader in pneumatic tube systems designed specifically for hospitals, has released a new product brochure that fully describes system specifications, station options, control panel features and its new line of carriers. Installation and start-up, customer training, and system support topics are also detailed.

Swisslog pneumatic tube systems are designed to ensure patient and staff safety, as well as protection of delicate medications and specimens during transport. The system is fast, reliable and offers hospitals long-term performance.

Swisslog pneumatic tube stations feature modern user control panels that utilize a multitude of special transaction features, including optional password protection, STAT sends, and an online directory. Optional electro-mechanical controlled access doors, available for TransLogic, Quantum, and Pevco stations provide security for carriers arriving at unattended stations.

For a copy of the [pneumatic tube system overview brochure](#) (CM# PTS-100) please visit www.swisslog.com and find TransLogic Pneumatic Tube Systems or call 1-800-764-0300.
