Swisslog Introduces Station Access Door for Recessed Pevco™ Pneumatic Tube System Stations

Denver, CO – Swisslog, a leading manufacturer and supplier of pneumatic tube systems for hospitals, has introduced a Station Security Access Door that operates independently from the station control panel and can be easily installed on both 4-inch and 6-inch Pevco™ manufactured recessed stations using Pevco™ or Swisslog control panels.

Swisslog's Station Access Door limits access to the station receive/dispatch bin through the use of electromagnetic locking technology. Once a valid PIN is entered into the keypad, the Station Access Door releases the lock. After opening, the spring-loaded door automatically closes and the lock is reactivated after a programmable timer expires. The Station Access Door stores up to five user PIN combinations (up to 8-digits each). The PIN combinations can be changed using a master code.

The Station Access Door addresses HIPPA concerns by increasing security and patient privacy and limits access of sensitive items to authorized personnel. These doors protect stations in public areas, providing added security, preventing children and unauthorized persons from accessing station contents or from initiating system sends.

Swisslog has released a brochure that fully describes the Station Access Door (CM#1230). Contact The Sun Kim for more information at 1-800-525-1841 x7864 or by email at the.sun.kim@swisslog.com. Learn more about Swisslog's Station Access Door by visiting the company's website at www.swisslog.com, the click on Healthcare Solutions.

About Swisslog

Swisslog is a global provider of integrated logistics solutions for warehouses, distribution centers and hospitals. Its comprehensive services portfolio ranges from building complex warehouses and distribution centers to implementing Swisslog's own software. In addition Swisslog provides intra-company logistics solutions for hospitals as well as software and consulting services in the field of supply chain management. Swisslog's solutions optimize customers' production, logistics and distribution processes in order to increase flexibility, responsiveness and quality of service while minimizing logistics costs. With years of experience in the development and implementation of integrated logistics solutions, Swisslog provides the expertise that customers in more than 50 countries around the world rely on. Headquartered in Buchs/Aarau, Switzerland, Swisslog currently employs around 2,000 staff in 20 countries worldwide. The group's parent company, Swisslog Holding AG, is listed on SWX Swiss Exchange (security number: 1232462, Telekurs: SLOG, Reuters: SLOG.S). For more information, visit www.swisslog.com.
