CONSUMER GOODS LOGISTICS FORUM

11 October 2018 in Augsburg at KUKA
Register at swisslog.com/LogisticsForum

Meet the Experts. Whether you're a CEO, Head of Logistics, Supply Chain Manager or IT Director, you'll have plenty of opportunity to network with industry experts.

Robotics Revolution. Warehouse of the Future. Learn more about fully automated, digitalized intralogistics and the unique efficiency it offers along the entire process chain. Know today what matters tomorrow!

Keynote and Masterclass presentations

- Experts demonstrate current product technologies such as fully automated mixed case palletizing (ACPaQ) and high-density pallet shuttle storage (PowerStore) using real-life examples.
- Smart logistics combines virtuality and reality: Cutting-edge technologies such as human-machine collaboration, augmented reality and artificial intelligence are front and center.
- Company representatives, scientists and digitalization experts discuss the latest logistics trends and share their insights.
