

PRESS RELEASE

Swisslog Healthcare Launches Next-Generation Pharmacy Analytics Platform to Transform Pharmacy Operations

Powerful database and visualization technologies create a scalable platform for optimizing central pharmacy operations and generating pharmacy performance insights.

DENVER, Colo. (Nov 29, 2017) – [Swisslog Healthcare](#), a leading supplier of medication and supply chain management solutions for health systems, announces the launch of Pharmacy Analytics, a cloud-based data analytics platform designed to help hospital pharmacies improve operational efficiencies. This new Pharmacy Analytics Platform leverages Swisslog Healthcare’s pharmacy automation know-how with deep data expertise to drive actionable insights that empowers pharmacy leaders and their staff to transform pharmacy performance by dynamically managing inventory, increasing stock turnover, decreasing stockouts and reducing waste.

“Our development team used the most powerful database and visualization technologies available to create a scalable platform,” explains Stephan Sonderegger, CEO of Swisslog Healthcare. “Analytics was engineered with industry-leading partners — Amazon Web Services for its cloud-based data warehousing and machine intelligence capabilities, and Tableau for its advanced data intelligence and visualization tools — to empower operational efficiencies.”

Swisslog Healthcare will debut its Pharmacy Analytics Platform in booth #1741 at the American Society of Health-System Pharmacists Midyear Clinical Meeting and Exhibition, December 4 – 6, 2017 at the Orange County Convention Center in Orlando. There, booth visitors will experience first-hand how advanced data visualizations can accelerate central pharmacy decision-making and optimize staff efficiency.

“Swisslog Healthcare is focused on transforming health systems through integrated solutions that change the way pharmacies work,” explains Sonderegger. “By integrating multiple systems and data streams, both real-time and static, Pharmacy Analytics gives users an unprecedented view of their entire medication management continuum.”

Swisslog Healthcare is demonstrating the power of Analytics in its booth at the American Society of Health-System Pharmacy (ASHP) Midyear Clinical Meeting in Orlando, Florida December 4-6, 2017.
