

SWISSLOG HEALTHCARE

Relay®

Autonomous Service Robot

Helping Staff. Delighting Patients. Enhancing Healthcare.

Relay® is a dynamic, low-profile autonomous robot that combines fast, secure delivery with a responsive, friendly human interface for reliable, more personalized services. Safe and secure, Relay delivers everything from medications and lab work to supplies and equipment throughout the hospital environment. Able to operate elevators and navigate busy hallways, Relay improves productivity and workflow while delighting everyone he meets.

Features & Benefits

- Dynamic, safe navigation—moves gracefully through unstructured areas
- Nimble and adaptable—easily travels around tight spaces or remaps to find most direct path to the destination
- Trackable, predictable deliveries
- Lockable payload
- Small, light footprint
- Autonomous elevator operation
- Friendly, delightful personality

Specifications

Dimensions:

Height 36in/92 cm
Width 20in/51 cm

Weight:

90lbs

Speed:

.7m/s

Communications:

WiFi
LTE Verizon or AT&T

Payload:

Volume: .75 cubic ft (.021 cubic meters)
Weight Capacity: 10 lbs (4.5 kg)
Security: Automatic Lock

User Interface:

Display 7" touch screen
Audio Stereo
Lighting RGB LED base ring
Cargo Lighting: Illuminated

Runtime:

Continuous Four hours
Charging Dock Floor mounted
Dock Et Relay 120V/3A 240V/1.5A

Navigation:

Fully autonomous indoor navigation
Obstacle avoidance
Multi-floor navigation
Elevator control
Ability to ride in occupied elevators
