AutoPharm® Enterprise Software

## AutoPharm® Enterprise Software

### Complete Medication Management

AutoPharm Enterprise is a powerful pharmacy management software application that integrates with your current investments in pharmacy and information systems and directly with AutoCarousel®, AutoSecure™, AutoCool®+H and AutoFreeze™+H.

Our enterprise-wide software manages medication inventory across your entire health system. This allows you greater inventory control while streamlining your workflow.

### Why AutoPharm?

**Gain greater control of your inventory:** By managing pharmacy inventory across your entire health system, including remote pharmacies and specialty clinics, AutoPharm gives you an immediate, real-time view of your enterprise-wide inventory. You gain greater control of inventory; plus, the ability to manage expiration dates and transfer inventory.

**Streamline your workflow:** AutoPharm automates and streamlines receiving, restocking, dispensing and returns. It facilitates ADC replenishment and cart fills. This improves your pharmacy workflow and allows you to more effectively utilize staff in higher-value clinical tasks.

**Improve patient safety:** AutoPharm supports and integrates with automated packaging and labeling solutions to barcode virtually 100% of your medications. Through the use of barcode scanning, lot number tracking and expiration date tracking, AutoPharm reduces the risk of dispensing errors.

Additionally, AutoPharm provides broader high-alert medication warnings, improving quality and patient safety throughout the health system.

**Optimize planning and budgeting:** AutoPharm gives you access to detailed reports on budgets, usages, discrepancies and inventory. These reports give pharmacy staff and leadership better information for planning, purchasing and staffing.

**Ensure data is consistent:** AutoPharm integrates with electronic health records, wholesalers, eMARs and other pharmacy automation systems.

“ The top benefits of [pharmacy automation powered by AutoPharm] are streamlined hospital pharmacy operations, reductions in drug inventory, increases in inventory turns and meeting the Pharmacy Department's strategic plans of drug safety and accountability.”

*Larry Schiller, MS, R.Ph., Pharmacy Network Director,  
Bronx-Lebanon Hospital Center*

KLAS: AutoPharm is rated the highest overall medication inventory management software application.

AutoPharm beats the industry for:

- Forecasted overall satisfaction
- Keeping promises
- Quality of web/phone support
- Delivering money's worth
- Driving tangible outcomes

*Source: KLAS Performance Report, Medication Inventory Management 2018*

AutoPharm is the medication inventory management application of choice for nearly 200 health system pharmacies in the United States.

# AutoPharm Enterprise Supports Your Pharmacy Goals

## Patient Safety

- Provides controls and checks for all medication dispenses and restocks, including additional safety features for high-alert and pediatric medications. Allows multiple barcode checks to receive, dispense and restock medications
- Works with barcode medication administration systems and automated dispensing units
- Integrates with automated packaging and labeling to barcode virtually 100% of your medications
- Auxiliary labeling system for special instructions related to medications
- Supports lot number tracking for manufacturer recalls
- Supports expiration date tracking

## Inventory Control

- Enables tracking and management of real-time, perpetual inventory
- Enables centralized ordering and inventory management to optimize on hand inventory
- Supports multiple pharmacy locations for more accurate communication and dispensing
- Supports web-based ordering from remote departments or hospitals
- Flexible security with role-based permissions
- Supports management and control of crash carts and other medication trays

## Workflow Efficiency

- Provides perpetual inventory tracking and management for multiple locations
- Works with centralized or decentralized pharmacy distribution models
- Automates receiving, restocking, dispensing and returns
- Optimizes automated dispensing unit replenishment and cart fill activities

## How Swisslog Healthcare is Different

We are unique in our ADC-agnostic approach and focus on innovation from the pharmacy core. Our commitment to the critical work done by hospital pharmacy staff ensures that our solutions will provide efficiency gains, clinical improvements and patient benefits for many years to come.

## Leading Change for Better Care

We strive to lead change for better care. At the core of this vision is a focus on improving workflows and reducing the time clinicians spend doing repetitive tasks—enabling more time to care for patients and residents. Our solutions and services extend along the continuum of care, including transport, medication and supply chain management for long-term care facilities, consolidated service centers, hospitals and health systems.
