

SWISSLOG HEALTHCARE

Broomfield Pneumatic Tube System Training Class Information

Schedule

Programs are four days in length (Monday-Thursday), with a class dinner on Thursday evening.

Daily Schedule

8am-5pm Monday-Thursday Mountain Time

Swisslog provides classroom training in our Automation Academy in Broomfield, CO. Held throughout the year, classes take place in a fully-equipped lab environment and are designed to cover a diverse range of pneumatic tube system (PTS) operations and maintenance. Onsite facility training is also available. [Program schedules can be viewed on the Swisslog website.](#)

Class Learning Objectives

Students thoroughly examine a PTS, learning how to operate and maintain the major components that make up a system similar to their own.

Our instructors are senior technical staff experienced in all aspects of Swisslog systems. All PTS courses focus on these areas:

- System overview, components and documentation
- Equipment theory of operation (electrical and mechanical)
- Maintenance procedures and schedule
- Troubleshooting common problems and repair
- Hands-on practical exercises

Course Descriptions**Translogic® PTS**

This course will provide students with an understanding of the operation, maintenance and repair of a Swisslog standard pressure/vacuum pneumatic

tube system. Components covered include blowers, stations, transfer units and the control center.

Xpress™ Technology

The focus of this course is on the components found in the Swisslog Xpress PTS – inline, radial and exit traffic control units (TCUs), Xpress stations and multi-linear transfer units (MTUs).

Note: Before attending Xpress training, students should have basic knowledge of standard PTS as the schedule does not permit coverage of both classes.

Who Should Attend

Classes are designed for anyone who services and/or maintains PTS. Attendees should have a working knowledge of electrical and mechanical components and theory; as well as basic familiarity with Microsoft® Windows and Windows-based software.

Registration

Class sizes are limited to provide adequate teacher/student interaction and thorough review of the system. If the minimum registration is not met, cancellation notifications will be sent two weeks prior to program; program fees will be refunded in full.

Upon receipt of confirmation, enrollee is responsible for making travel arrangements.

Fee/Expenses

Program fee of \$1,950 USD plus applicable tax per enrollee is payable in advance. Fees cover tuition, program materials, daily lunches and one dinner.

Cancellations

Cancellations must be made two weeks prior to program start date or a 10% cancellation fee will be imposed.

Travel Arrangements

Contact the following hotels directly and mention the Swisslog Corporate Rate.
