Employees

500+ North America, 1,200+ Global

Global Presence

Business operations in 20 countries on four continents, serving more than 10,000 installed systems at over 3,000 hospitals worldwide

Care Settings

Automated solutions are at the core of progressive healthcare systems—helping workflows hum, improving logistics and reducing costs. Find our solutions and services in:

Hospital Pharmacies – Ensuring timely, accurate medication dispensing and sophisticated inventory management for central pharmacies worldwide and outpatient pharmacies in Asia

Hospital Facilities – Installing and maintaining reliable, state-of-the-art pneumatic tube systems all over the world

Consolidated Service Centers – Automating supply chain management, warehouse operations and material movement

Retail Pharmacies – Automating medication storage, retrieval and dispensing in many European countries

Long-Term Care – Easing nurse workloads with remote dispensing

Our expertise in healthcare automation is broad, extending decades across care settings. Forward-thinking leadership along with thousands of talented employees support Swisslog Healthcare's extensive customer base. We commit to advancing healthcare by enabling our customers to operate more efficiently, effectively and safely.

Solutions and Services

At Swisslog Healthcare, we strive to lead change for better patient care. We focus on improving workflows, reducing the time clinicians spend on repetitive tasks so they may spend more time with patients and residents. Our solutions and services extend along the continuum of care, including transport, medication and supply chain management for long-term care facilities, consolidated service centers, hospitals and health systems.
