Trinchero Family Estates
USA

**22 PALLETS
LOADED EVERY
12 MINUTES**

Coca-Cola Amatil
Australia

Our goal is your competitive advantage.

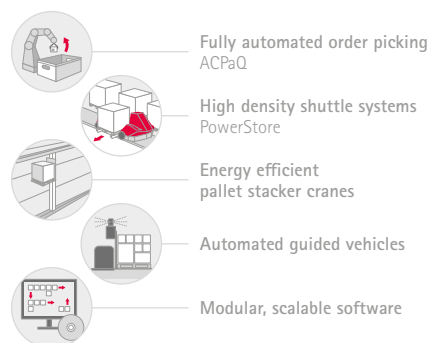

A safer, faster and more personalized approach to your warehouse operations.

The beverage industry is more competitive than ever. New types of drinks and flavors are constantly entering the market – from crossover beverages to craft brews, from low sugar drinks to wines and spirits that cater to evolving customer tastes. Unlike in the past, modern warehouses must be able to deliver non-standard pallets with the variety of products a customer wants, quickly and cost-effectively. The key to suitable storage and distribution solutions is automation.

Your future success in this challenging environment will depend on versatility, efficiency and quality. It will become increasingly important to be able to manage a large inventory and varying SKUs and to maximize utilization of available warehouse space. You'll need to be able to handle new packaging formats for large supermarkets as well as home delivery. And you'll need to track the product along with its ingredients throughout the supply chain, all while guaranteeing product safety and freshness – as well as enabling a safe last mile delivery.

Future-proofing your warehouse will be vital to compete. Swisslog has been a long-time partner to the top players in the food and beverage industry with a proven track record of solving warehouse and distribution challenges. Our automated solutions are perfectly customized to your needs. They ensure the optimal flow of goods at a low cost per pick, helping you to keep your beverages moving to the right place at the right time.

Swisslog Solutions: Our commitment. Your competitive advantage.

We shape the future of your intralogistics.

Solutions powered by a single platform.

Industry 4.0 has arrived – and it is here to stay.

The digital world is developing at a breathtaking pace. Every industry sector is going through a transformation towards a globally networked and integrated economy. This includes the beverage industry: automation and robotics, connectivity and increased use of data are driving changes to intralogistics.

In this new era, Swisslog is a pioneer.

Our experience with flexible and data-driven solutions spans decades. Bring transparency and efficiency to your warehouse with our Industry 4.0 concepts so your intralogistics can evolve: from a large rigid system into modular, software-driven solutions that can adapt to changing market demands. Backed by KUKA, Swisslog is ready to lead you on the journey to achieving the highest intralogistics performance in a digital age.

Software is at the heart of our solutions.

SynQ, our material handling software, encompasses warehouse management, material flow and automation control system functionality in a single platform. It can visualize your system in 3D and also provide an array of business intelligence tools, such as condition monitoring. SynQ allows you to synchronize automation equipment, robotics, people and processes for peak performance, and offers intelligent services for a smart future.

Swisslog Success Stories

Proven expertise for leading businesses.
Get ahead. Stay ahead.

Coca-Cola Amatil, Australia

The company is one of the largest bottlers of non-alcoholic ready-to-drink beverages in the Asia-Pacific region and one of the world's top five Coca-Cola bottlers.

Customer Challenge: Reducing the need for multiple warehouses, plus future proof for growth; reducing warehouse operating costs; improving inventory management.

Result: Optimized utilization of high bay resulting in world class levels of throughput, pick accuracy and order fulfillment.

The Absolut Company
Pernod Ricard

The Absolut Company, Sweden

Absolut Vodka became a well-known iconic lifestyle product during the 1980s, making the company a global industry leader.

Customer Challenge: Meeting increased market volumes and ensuring shipping capacity over seasonal peaks.

Result: Improved efficiency and flexibility due to extension of existing storage and distribution center with automated high bay warehouse, plus additional 6,000 pallet locations and longer rackings.

TRINCHERO
Family Estates

Trinchero Family Estates, USA

The company is a worldwide leader in the wine industry, with more than 45 acclaimed wine and spirits brands and a global presence.

Customer Challenge: Centralizing bottling and distribution with production in a new facility; improved speed and tracking.

Result: Automated distribution system and software integration: minimized handling, energy and transportation savings, improved quality in the new facility.

Solutions for your entire supply chain.

Future-ready in a changing beverage market.

Design

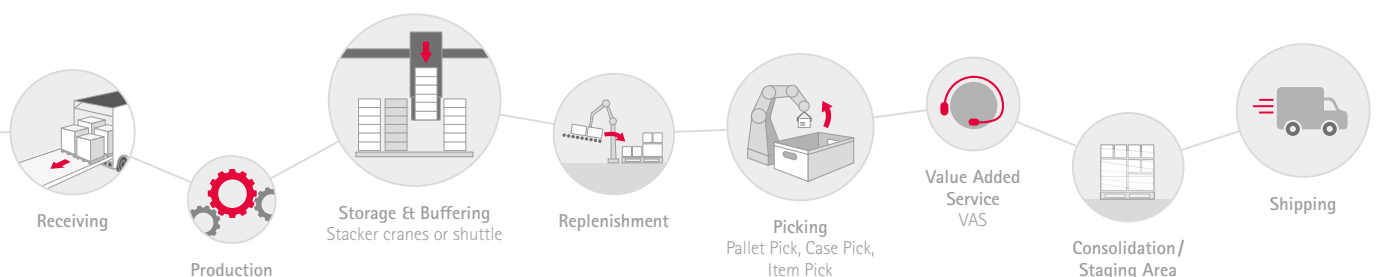

Understanding and analyzing your data to maximize the performance of your operation. For a solution with a perfect fit.

Develop

Flexible, adaptive logistics solutions so warehouses can improve efficiency in the constantly changing food market.

Deliver

Everything you need to optimize your logistics: outstanding service, support and future-ready technology for high-quality results.
